Introduction by Matt Luckham

This is an important update, that will have an impact on future work and updates that we complete. Along with a number of simple fixes and enhancements, we are introducing a new CC Windows installer which will support 64 bit Microsoft Office. This will allow Care Control to phase out support for Microsoft Access 2010 over the next few months.

Systems Versions

After this update you should be using Care Control Windows version 3.31 or higher and Care Control Mobile 4.35 or higher.

V-Book Changes

We released V-Book in January. It has been great to see many of our clients start to use this new tool. We have listened to your feedback and have made some enhancements: -

V-Book Specific Logo

We have added a settings within V-Book which will allow you to change the logo: -

On this screen you can define key settings that are associated with the Visitor Book Tool.

Add Service User Note: Yes

Save Changes

The default will be your company logo, but this can be changed if you would like.

Car Reg Skip Setting

We have added a Yes / No setting so that when a service user visitor signs into V-Book as a repeat visitor, if you set this setting to NO, the system will not check the Car Registration with the visitor.

Check Car Reg in Sign In:

Changes to V-Book Screens

We have increased the font size for users when entering initials on V-Book. We have also added a Finished button on all entry text boxes: -

Please register your details below

First Name:

Surname:

Car Reg.:

4 Digit Pin:

If you provide a 4 digit pin number, the next time you visit you can simply enter your initials and PIN number to sign into the book.

Who are you planning on visiting?

Service User Initials:

Room Number:

Add

 Continue...

Touch the screen or the Finished button to continue

Please register your details below

The Finished button as above.

Weight Recording Improved

The weight recording screen on CC Mobile could be fragile on slower internet connections. It was also possible to “accidentally” record a entry weight of 25kg, as this was the default. These changes have been implemented: -

Current User: Matt Luckham [Get Help] [Home] [Finish]

Record Weight for Ground Floor 2 - Maureen Woolgar

Date Recorded: Friday 14 February 2020

Measurement Type: Stone & Pounds (Imperial) [checked] Kilograms & Grams (Metric)

Previous Recordings

Recorded Date	Weight - KG	Weight - Stone (nearest pound)
05/01/2020	67	10 Stone 8 Pound
05/12/2019	67.01	10 Stone 8 Pound
04/11/2019	67.13	10 Stone 8 Pound
03/10/2019	67	10 Stone 8 Pound
27/08/2019	67	10 Stone 8 Pound
20/08/2019	67.01	10 Stone 8 Pound
23/07/2019	68.01	10 Stone 10 Pound

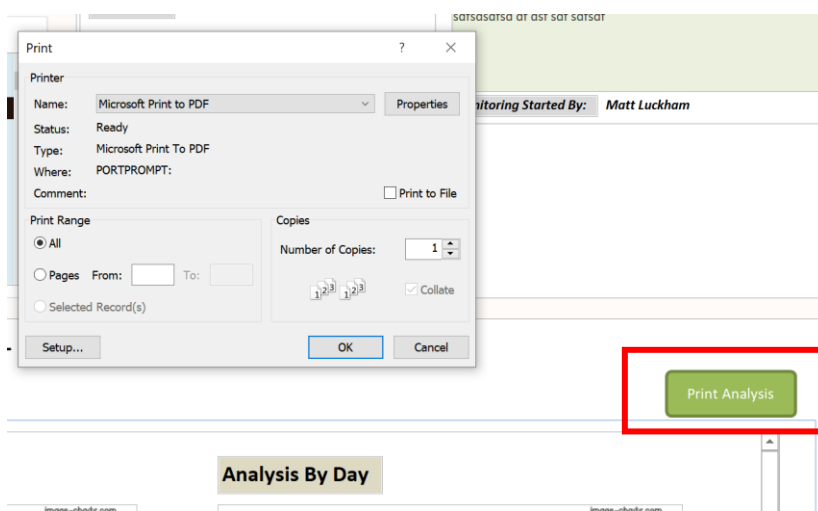

Select Weight Below

0 Stone	0 pound
4 Stone	1 pound
5 Stone	2 pound

Behaviour Analysis Print Dialogue

We have added a print dialogue window when the Print Analysis button is pressed: -

Various Fixes

A number of fixes have been made to Custom Single Form Monitoring and we will continue to improve this complex, but important new feature.

New CC Windows Installer

Related to this release is a new installer which we will start to roll out in the coming weeks. Users of Office 365 who have installed the 64 bit version, were unable to run CC Windows. Instead they have had to install the legacy version of CC Windows which runs on Office 2010.

This has brought an unnecessary level of complexity to installing and running CC Windows on 64 bit versions of office. This update lays the foundation to allow for a new installer to be deployed that will support both 32 bit and 64 bit versions of office.

The Care Control support team will target users who have specific issues with CC Windows first, by migrating them to this new installer. We will then start a process of rolling out the new version to ALL CC Windows users.
